# Leadership Cayman

## LEADERSHIP CAYMAN

Middle management is the stepping stone to making a great and dynamic leader. But it can be tough work and without the right guidance it can become too difficult a challenge to overcome. This is where the Leadership Cayman Programme steps in.

Launched in 2009 by the Cayman Islands Chamber of Commerce, the six-month intensive course enables class members to develop new skills, learning an abundance of vital information along the way. By attending seminars held by expert speakers, class members will acquire priceless knowledge that will help shape their future career path and success. Leadership Cayman also provides its members with access not available elsewhere, including networking sessions with Government officials and keynote speakers who attend Leadership Cayman seminars solely.

Class members will forge bonds with their peers, and along the way they will better understand the community in which they live, and ultimately contribute back into society. If learning more about social, economic, business, and political issues is of interest to you, then you need the Leadership Cayman programme.

Ensure the success of your future today. Become the leader you aspire to be. Apply for the Leadership Cayman programme today in order to connect, grow and inspire.

Leadership Cayman has been an amazing experience. 2016 did not start off in the best way personally for me and being a part of this awesome group of people helped me to get back on track. I have bonded with people whose path I otherwise wouldn't have crossed and it has opened my eyes to perspectives and viewpoints that I may not ever have turned my mind to. It has been an intensive and rewarding experience all around.
